OBJECTIVE

Motivated MCA student and aspiring MERN Stack Developer seeking an entry-level opportunity to build scalable full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Passionate about learning new technologies, developing RESTful APIs, and contributing to team success through problem-solving and continuous improvement.

SKILLS

- **Languages:** JavaScript, Java, C, HTML5, CSS3
- **Frontend:** React.js, Tailwind CSS, Redux Toolkit
- **Backend:** Node.js, Express.js
- **Databases:** MongoDB, MySQL
- **Concepts:** REST APIs, OOP, Git, Responsive Design
- **Tools:** Git, GitHub, VS Code, Postman

EDUCATION

- **Master of Computer Applications (MCA)** July (2025) – May (2027)
Jaypee Institute of Information Technology, Noida
CGPA: 9.38
- **Bachelor of Computer Applications (BCA)** July (2022) – July (2025)
Mahatma Jyotiba Phule Rohilkhand University, Bareilly
75.9%

PROJECTS

- **SocialNova** 
 - **Tech Stack:** React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Tailwind CSS, Socket.IO, Cloudinary
 - Developed a scalable full-stack social media platform with features like authentication, post creation, likes/comments, follow/unfollow system, and personalized feed.
 - Implemented real-time chat and notifications using Socket.IO, along with advanced search and filtering for improved user engagement.
 - Integrated secure image/video upload using Cloudinary and built robust RESTful APIs with Node.js and Express.js for efficient data handling.
 - Deployed the application on cloud platforms (Render), ensuring performance optimization, responsiveness, and seamless user experience.
- **ExamNotes.Ai** 
 - Developed an AI-powered study platform using the MERN stack that transforms uploaded PDF notes into structured, exam-oriented notes using the Gemini API.
 - Implemented secure JWT authentication, OTP-based password recovery, and a credit-based system with Razorpay integration for AI note generation.
 - Built a responsive and interactive user interface using React.js, Tailwind CSS, Redux Toolkit, and Framer Motion, featuring note history, upload workflow, and pricing pages.
 - Designed and integrated RESTful APIs with Node.js, Express.js, and MongoDB for PDF processing, user management, note storage, and AI-generated content delivery.
- **Tourist Management System**
 - Developed using Java and Object-Oriented Programming (OOP) to manage tour packages, customer bookings, cancellations, and account operations.
 - Implemented file handling for persistent data storage and retrieval, ensuring efficient management of user and package information.
